**WALLTEC AUSTRALIAN GROUP HAS BEEN DELIVERING LANDMARK PROPERTY AND INFRASTRUCTURE ASSETS FOR MORE THAN 10 YEARS. WE ARE A LEADING NATIONAL CONTRACTOR WITH A FOCUS ON SUSTAINABLE GROWTH.**

We can build the communities future by creating and providing large scale structures, landmark buildings infrastructure projects whilst remaining focused and motivated.

Based in New South Wales, our goal is to broaden our horizon nationwide. Our strength lies in our 10 years of experience in business of which we use to seize opportunities.

We have your interests at heart. That's why we use our skills and expertise to meet and exceed your expectations and ensure the outcome will benefit the community and the residents.

Innovation. That's what makes us different. We use our creativity and involve our clients in our plans, our thinking and our ideas so that they be a part of the process.

We stand together in our goal to deliver what the client requests.

Our business is ready to face any challenge! We represent a leading company who will work to be successful in clients eyes.

### Products

We specialise in Supply & Installation of the following:

- **Ritek - XL Wall System and XL Thermal Wall System**

- **AFS – REDIWALL (PVC) and LOGICWALL**

- **Dintel Construction System**

- **Permaform**

### Sustainability: Financial and Environmental

We know value when we see it. That is why we at Walltec Australian Group want to represent our hard working business by not only making sure of client satisfaction, but keeping our relationship strong with clients well after finish date.

We are all about safety and quality! We make it a priority to improve everything we do which can affect the economy, environment and certainly our client. We value our customers and endeavour to show them using our leadership and networks

We sustain an advantage by making sure we provide a wide spectrum of value to stakeholders which are a part of the community.

A positive attitude is what we use to better ourselves and to achieve goals set, whilst also wanting to inspire and motivate the people within our company to help meet client needs and expectation

Our clients returns can be optimised and value can be added when we go above and beyond and outperform for the benefit of our clients.

### **Collaborative Contracting**

At Walltec, we believe that is very important, even vital, to maintain the relationship between client and company and have your best interest at heart.

Teams collaborate and discuss different approaches on how to better the outcome of the project and how to effectively work with clients. We identify key points and problems and work out solutions through innovation and various resources.

### **Management Systems**

- Focusing on the long term, whole of project life
- Focusing on upstream control of critical elements through rigorous analysis of risks and opportunities
- Focusing on closing the gap between concept and work process amidst the

variability of behaviour and performance within the industry.

At Walltec, we:

- Not only the finished product but sustaining a relationship with clients after the finished date.
- Consistently analyse elements and risks and acting accordingly.
- Focusing on the concept and then aspiring to turn it into the finished project with outstanding performance.

At Walltec Australian Group, planning is essential and a key role in the success of our expertise and company.

We plan to minimise risk and harm and complete the project effectively to the satisfaction of the client.

We use what we call 'WOS' = 'Walltec Australian Group Operating System', which is our management system,.

This system includes safety logistics, operations customer relations, accounting, marketing and programming. Using this system, we can enhance the performance towards the end-product for our clients and ensure they walk away satisfied with our work.

### **Employee & Industrial Relations**

Our company is able to provide experience in tackling different challenges. We use this experience to also identify issues and ensure they are properly taken care of.

We deal with industrial relations in key parts of Australia and its cities and consult with organisations in the engineering community.
